

## JOIN THE BAM TEAM

### WHAT WE DO

BAM is one of the UK's leading student media and advertising specialists. We have been connecting brands with the student market for over 13 years and in that time we have built up an extensive Media Portfolio. Using this Media Portfolio, we provide our clients with the gateway to the student market, aiding brands to engage with students throughout the UK.

### WHAT WE'RE LOOKING FOR

**Post:** Web Developer

**Salary:** £24,000

**Hours:** 40 hours per week (Mon-Fri 9am-5.30pm)

**Location:** 26 Cambray Place, Cheltenham, GL50 1JN

**Duration:** Permanent

We are looking for an experienced Web Developer with an in depth knowledge of PHP/MYSQL and a proven ability to provide well-rounded, bug-free work consistently. Working on our core internal platforms, you will be required to effectively manage your own time and projects, demonstrating an ability to manage set deadlines whilst ensuring high quality work every time. You will need to demonstrate excellent attention to detail along with the ability to select the most appropriate coding styles for a variety of projects, ensuring the provision of logical design and development that is intuitive for the end user. Essential technical skills required include: HTML, MYSQL, PHP, AJAX, CSS, and experience in database design.

### ROLE REQUIREMENTS

The successful candidate should be able to demonstrate their experience in or ability to:

- Consistently deliver well rounded, bug free work, ensuring cross browser compatibility, scalability and well documented resources
- Develop projects to specified briefs and self-manage their time to ensure all deadlines are met without compromising quality
- Aid a Technical Support team on new projects and amendments that have been developed to ensure they are able to troubleshoot the platform effectively
- Troubleshoot any technical problems with new and existing code sets
- Ensure all projects pass vigorous quality assurance tests for;
- Cross Browser Testing to ensure maximum compatibility
- Accessibility to WCAG guidelines to ensure maximum usability
- Quality testing which will mean that our products are fully tested prior to general release for removal of any coding issues

### HOW TO APPLY

*We believe that work should be challenging but the challenge should be fun!*

*Do you think you could add value to our dynamic team?*

If you feel you have what it takes to succeed in the above role please send across your CV and covering letter to Richard Moseley (Web Director) at [careers@bamuk.com](mailto:careers@bamuk.com) quoting Job Reference BAM104. Alternatively call us on 0845 1300 667.

**Closing date for applications - 22/01/12.**
